LibertyLink® Soybeans with Ignite® herbicide enables growers to effectively avoid or manage weed resistance as the only nonselective alternative to glyphosate-tolerant systems. LibertyLink soybean varieties combine elite genetics and excellent crop safety with built-in tolerance to the powerful, postemergence weed control of Ignite. High-yielding LibertyLink soybean varieties are available in a range of maturities.

Ignite herbicide over the top of LibertyLink soybean varieties provide cost-effective, nonselective postemergence control of and grass weeds, including weeds resistant to glyphosate and multiple herbicide classes.
